### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel Ackerman, Attorney on January 18, 2006.

#### **IN THE ABSTRACT:**

Replace the abstract with the following:

--A method and kit for simultaneous detection and/or determination of a plurality of modified proteins in a sample. The method comprises: a) contacting the sample under mild protein denaturation conditions with a plurality of first antibodies capable of binding to a specific target protein, the first antibodies being immobilized on solid support material, each first antibody being differentiable from others by a differentiation parameter, whereby the first antibodies bind to respective target proteins present in the sample; b) removing unbound materials from the locus of the first antibodies; c) contacting the materials from step (b) with one or more second antibodies, each of which is specific to a class or subclass of modified proteins or with a plurality of second antibodies, each of which is specific to a modified protein, so as to bind the second antibody or antibodies to modified proteins in the sample; and d) detecting and/or determining a plurality of modified proteins in the sample. The kit comprises a plurality of primary antibodies immobilized on solid support material, one or more buffers for

lysing and for washing cellular material samples to be assayed, an assay buffer for conducting the assay, the buffer containing a sulfate or sulfonate detergent, and one or more second antibodies specific to the modified proteins.--

IN THE CLAIMS:

Cancel claims 22 and 24-35 without prejudice.

Claim 1 replace step a) with the following:

-- a) adding a sulfate or sulfonate detergent, in a concentration of about 1-10 mM and a plurality of first antibodies capable of binding to a specific target protein to said sample to create a mixture and incubating at a temperature of between about 4 and 37 degrees Celsius, and for a time of from about 2 to about 72 hours, wherein the first antibodies are immobilized on solid support material, each first antibody being differentiable from others by a differentiation parameter, whereby the first antibodies bind to respective target proteins present in the sample;--

Claim 23, line 1 delete the recitation "according to claim 22" and replace with -- according to claim 1--.

Replace claim 36 with the following:

--In a process for simultaneously analyzing a sample for a plurality of modified proteins, comprising denaturing a plurality of modified proteins, wherein the improvement comprising adding a sulfate or sulfonate detergent, in a concentration of about 1-10 mM and a plurality of first antibodies capable of binding to a specific target protein to said sample to create a mixture and incubating at a temperature of between about 4 and 37 degrees Celsius, and for a time of from about 2 to about 72 hours.—

2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor suggests a method as recited comprising adding a sulfate or sulfonate detergent in a concentration of about 1-10 mM and a plurality of first antibodies capable of binding to a specific target protein to said sample to create a mixture and incubating the mixture at the temperatures and times as recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
